Hatch Pack. 26L

91001

Product Features:

- 600D poly two-tone/420D dobby poly
- Luggage trolley strap with hook and loop closure

Rear-entry suspended, padded laptop compartment

Padded back panel with moisture-wicking air mesh

Ergonomic, adjustable, padded shoulder straps with adjustable sternum strap

Available Colours and PMS Colours

Textile fabric colours are subject to dye lot variation and will not be exact match to print Pantone reference.

BLACK/ HEATHER GREY
Black 6C/ 4287C

LASER RED/ HEATHER GREY
186C/ 4287C

91001 - OGIO® Hatch Pack. 26L

Bag Measurements

Approx. Dimensions	18.5"h x 12"w x 8"d
Volume in Cu In./Litres	1,586 cu. in./26 L
Weight	2.1 lbs./0.99 kg
Laptop Sleeve	15"h x 10"w x 1"d; fits most 15" laptops

Decoration Area

Location	Size
Front Zippered Pocket	6"w x 9"h

Finished measurements in inches. Refer to “How to Measure” guide for detailed information on measurement instructions.

Printing Instructions for Polyester Fabrics

Due to the nature of polyester, special care must be taken throughout the decoration process.

EMBROIDERY

- For best results, magnetic or clamp frames are recommended for stability and max decoration range.

SCREEN PRINTING

- Low-cure poly inks are required. Grey or black bleed blockers may be necessary.
- Polyester requires a longer cooling time than cotton. Avoid overlap of garments and screen-print/heat transfer until the garments are cooled. Failure to cool the fabric prior to stacking into a printer’s fold may cause the fabric and applied ink to stick together.

HEAT TRANSFERS

- Poly mark heat transfers need to be created with an anti-migration layer in the design. This process can only be done on white or very light colour shirts. Inks used in printing paper design needs to be darker than the base fabric or colour will migrate with the fabric colour resulting in a bleeding effect.

A test sample run is recommended, especially if you have a large order or if your printer does not specialize in printing on performance fabrics.
